Deleum BHD bags corporate excellence award

Focus Malaysia 20 Sep 2018 12:37

Deleum Berhad, a provider of diverse range of supporting specialised products and services to the oil and gas industry, was awarded the Corporate Excellence for the Oil and Gas industry by Enterprise Asia at its Asia Pacific Entrepreneurship Awards (APEA) 2018 ceremony recently.

The APEA is a Regional Award Recognition programme recognising entrepreneurial excellence. It honours business leaders and organisations which have shown outstanding performance and tenacity in developing successful businesses, whilst not neglecting the social responsibilities that come with leadership.

Nominees of the Corporate Excellence Award were judged on their organisation's business growth, corporate leadership and operational excellence.

Under Business Growth, an organisation needs to showcase its market competitiveness, peer and industry recognition as well as local and global impact. Corporate Leadership encompasses the practice of responsible entrepreneurship, vision and strategic direction, value creation and entrepreneurial attributes along with the ability to overcome adversities. Operational Excellence includes innovation and sustainability, succession plan, technology advancement as well as risk and people management.

Receiving the award on behalf of Deleum was its Group Managing Director, Nan Yusri Nan Rahimy.

"Excellence has always been one of our core values for Deleum. It underscores the services we offer, the products we develop and the drive of our people. This award is recognition of the commitment and dedication of our personnel and management in making excellence a corporate collective responsibility," said Nan Yusri.

According to Nan Yusri, Deleum's strategies, organisational and operational structures as well as inherent strengths contributed to the Group's ability to remain resilient and profitable amidst the industry downturn. Moving forward, Deleum will continue to build on its success and remain committed to uphold good governance and business ethics across its core businesses.
