### Deleum chalks in impressive H1 results

KUALA LUMPUR — Deleum Bhd a provider of diverse range of supporting specialised products and services to the oil and gas industry, recorded a 25 per cent increase in pre-tax profit to RM40.4 million for the half-year ended June 30, compared to RM32.3 million in the corresponding period. The increase for the current 6-month period was largely due to higher segment results from the oilfield services and power and machinery segments. Deleum's oilfield services segment saw a 192.6 per cent increase in its segment results to RM15.2 million for the current 6-month period against RM5.2 million in the corresponding period. The improved results are in line with the increase in activities of the segment.
