### Deleum declares 1.4 sen dividend despite 5% lower net profit

Deleum Bhd's net profit in the second quarter ended June 30, 2019, fell 5.57% to RM8.66 million from RM9.17 million on weaker results from both its power and machinery and oilfield services segments. However, it declared a higher dividend of 1.4 sen per share for the first interim period in FY19, from 1.25 sen per share last year.

Deleum's pre-tax profit in the period was 0.48% lower at RM13.28 million from RM13.34 million previously, no thanks to higher costs and other operating losses, which offset higher share of results of associates. Revenue, however, jumped 52.31% to RM212.16 million from RM139.29 million, thanks to higher contribution across all segments with strong support by the Integrated Corrosion Solution segment mainly from its MCM contract.

For the half-year ended June 30, 2019 (6MFY19), Deleum's net profit rose 8.51% to RM11.48 million from RM10.58 million last year, as higher results of associates offset the higher administrative expenses in the period. Gross profit was flattish year-on-year despite revenue rising 37.07% to RM339.66 million from RM247.8 million in 6MFY18.
